Hi Laura,

I connected with Rex on this issues and he said that Dennehotso and Inscription House are not impacted from a drinking water standpoint, as they both use groundwater wells for drinking that are not impacted by the river. He defers to NN on whether they would be impacted chapters from a livestock or agricultural standpoint.

Best,

Amanda

Linda;

Thanks for sharing the information about Dennehotso, Huerfano, Inscription House. We looked at those with NN folks here. They felt that Herfano is above the Animas confluence, so wouldn't be impacted.

For Dennehotso and Inscription House, they deferred to NTUA – can you get an opinion from Rex or someone about whether they are affected and need outreach (or perhaps if they are not affected but still need outreach to assuage concerns) based on their

drinking water source and distance to the river? They are interested in NTUA's opinion.

If you have other info about Huerfano, please share!

LE
